

EUROPES LEADING DIGITAL EMPLOYMENT Services company

GASELL AWARDS

The 2022 Gasell Awards

Curonova placed 16 out of 745 high growth businesses at the prestigious DI Gasell awards. A strong motivating factor for the high placement was Curonovas incredible revenue growth of 931% from 2018 to 2021.

and support to individuals that are looking to t work situation and wish to find a new job that eds.

to help unemployed individuals receive skills that back to the labour market.

MARKET REFORMS TO BE COMPLETED BY Q4 2022

Reform 2023

The Swedish Public Employment Service (Arbetsförmedlingen) is currently being reformed. By Januari 2023 the majority of the responsibility for helping long term unemployed people back to the labour market will be placed upon private employment service providers.

Expensive policy measures

Prior to the reform Sweden's expenditure on active labor market policy measured over the past decade has been about four times as large as the cost of Australia's privatised labour market according to data from the OECD*.

Growing long term unemployment

Sweden, and many other industrialised economies have seen a rapid growth of long-term unemployed due to the rising demand for qualified jobs as well as the recent growth of immigrants with lower levels of education.

The new market favours results

Curonovas mission is to use technology to help reduce exclusion in the labour market by helping the long-term unemployed or immigrants find a sustainable work solution.

Long term unemployed without high education

CURONOVA IS TRANSFORMING A LEGACY INDUSTRY

RELATIVE ANALYSIS TO DIGITAL HEALTH CARE PROVIDERS

Curonova is transforming the private employment services industry in a similar way to how many digital health care providers such as Kry, Babylon, Doktor.se have significantly reduced friction associated with visiting physical clinics, providing a faster more efficient digital solution.

DIGITAL AND SCALABLE GROWTH MODEL

COMPENSATION MODEL FOR PRIVATE EMPLOYMENT SERVICE PROVIDERS

Swedish Compensation Model

The business model for the "Rusta & matcha" service is tailored towards rewarding those providers that help the unemployed into lasting jobs or education.

Curonova can retain a participant for up to 12 months and receives a monthly compensation until the participant finds work.

Curonova receives higher levels of compensation depending on how distant a participant is deemed to be from the labour market, i.e. how well he/she is equiped for the labour market.

Curonova also receives higher compensation depending on how fast the participant is placed into a job or educational program.

Distance from Labor market

C - far off

| Monthly compensation (20 days) | Bonus at job | Bonus for remaining time |
|--------------------------------------|--------------|-----------------------------|
| 1100 SEK | 20 300 SEK | 7 260 SEK |
| 1360 SEK | 28 700 SEK | 9 042 SEK |
| 1800 SEK | 38 000 SEK | 11 880 SEK |

GROWTH ENGINE

7. Attracts More Participants

A superior service attracts even more new participants reducing customer acquisition costs over time

6. Providing a Superior Service

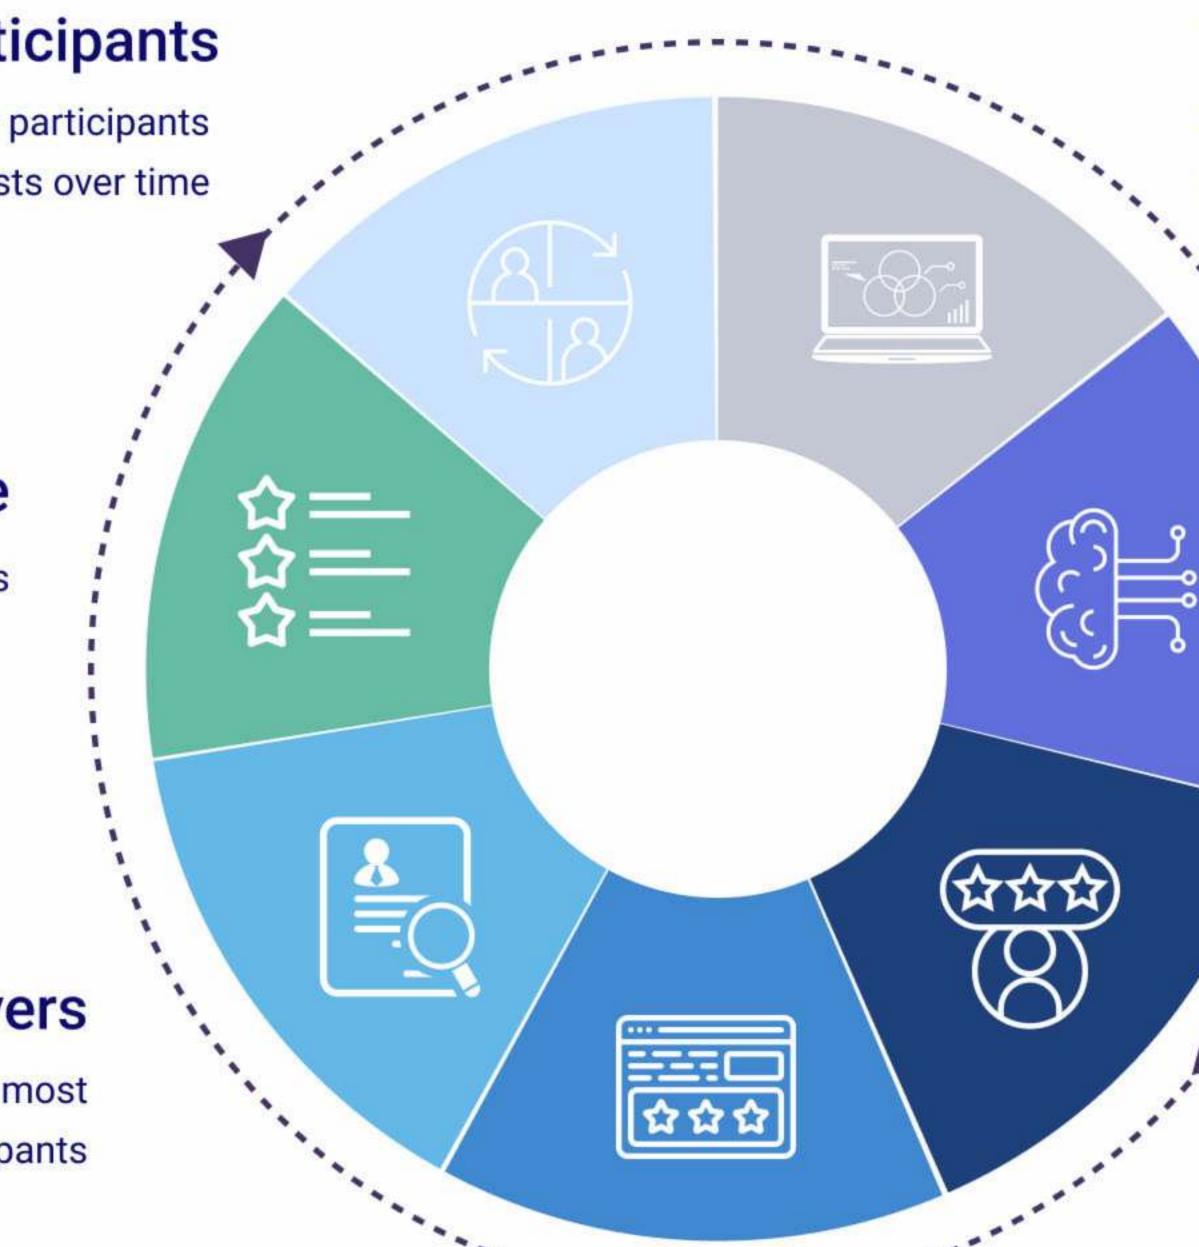

Having the most relevant pool of employers gives participants a higher chance of finding work.

5. Valuable Supply of Employers

As a result Curonova gains strong relationships with the most applicable employers for its participants

* NLP (Natural Language Processing)

Increasing Curonovas Barriers to Entry

4. Increased Trust

Consistent results attracts employers and increases the trust for Curonova

1. Data Collection (Participant Data)

With structured data input, Curonova can analyse, segment and visualise relevant data.

2. Machine Learning*

More data helps to continously improve Curonovas job recommendations providing an improved personalized user experience over time.

3.Improved Match Rate %

Improved algorithms enables higher probability of match rates between participants and employers.

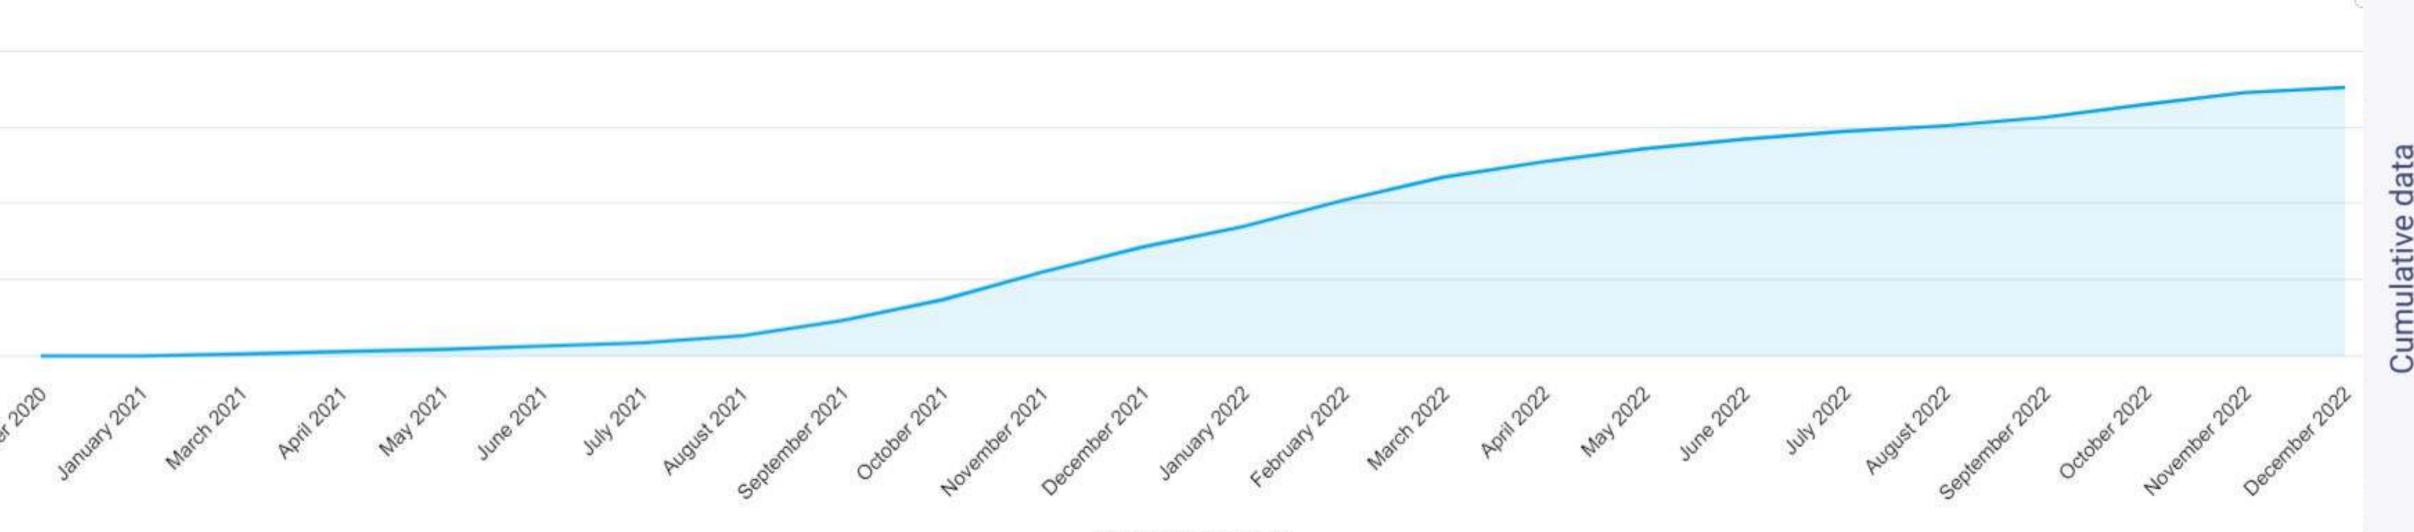

CORE FOCUS ON BUILDING A SUPERIOR PRODUCT

Curonova is continuously adding valuable data (participant data) improving the efficiency of its job recommendation algorithms as well as providing valuable insights for Curonovas coaches, distancing the quality of its services compared to legacy competitors over time

Volume of Participant Evaluations

HELPING PARTICIPANTS FIND WORK FASTER

Data driven methodology

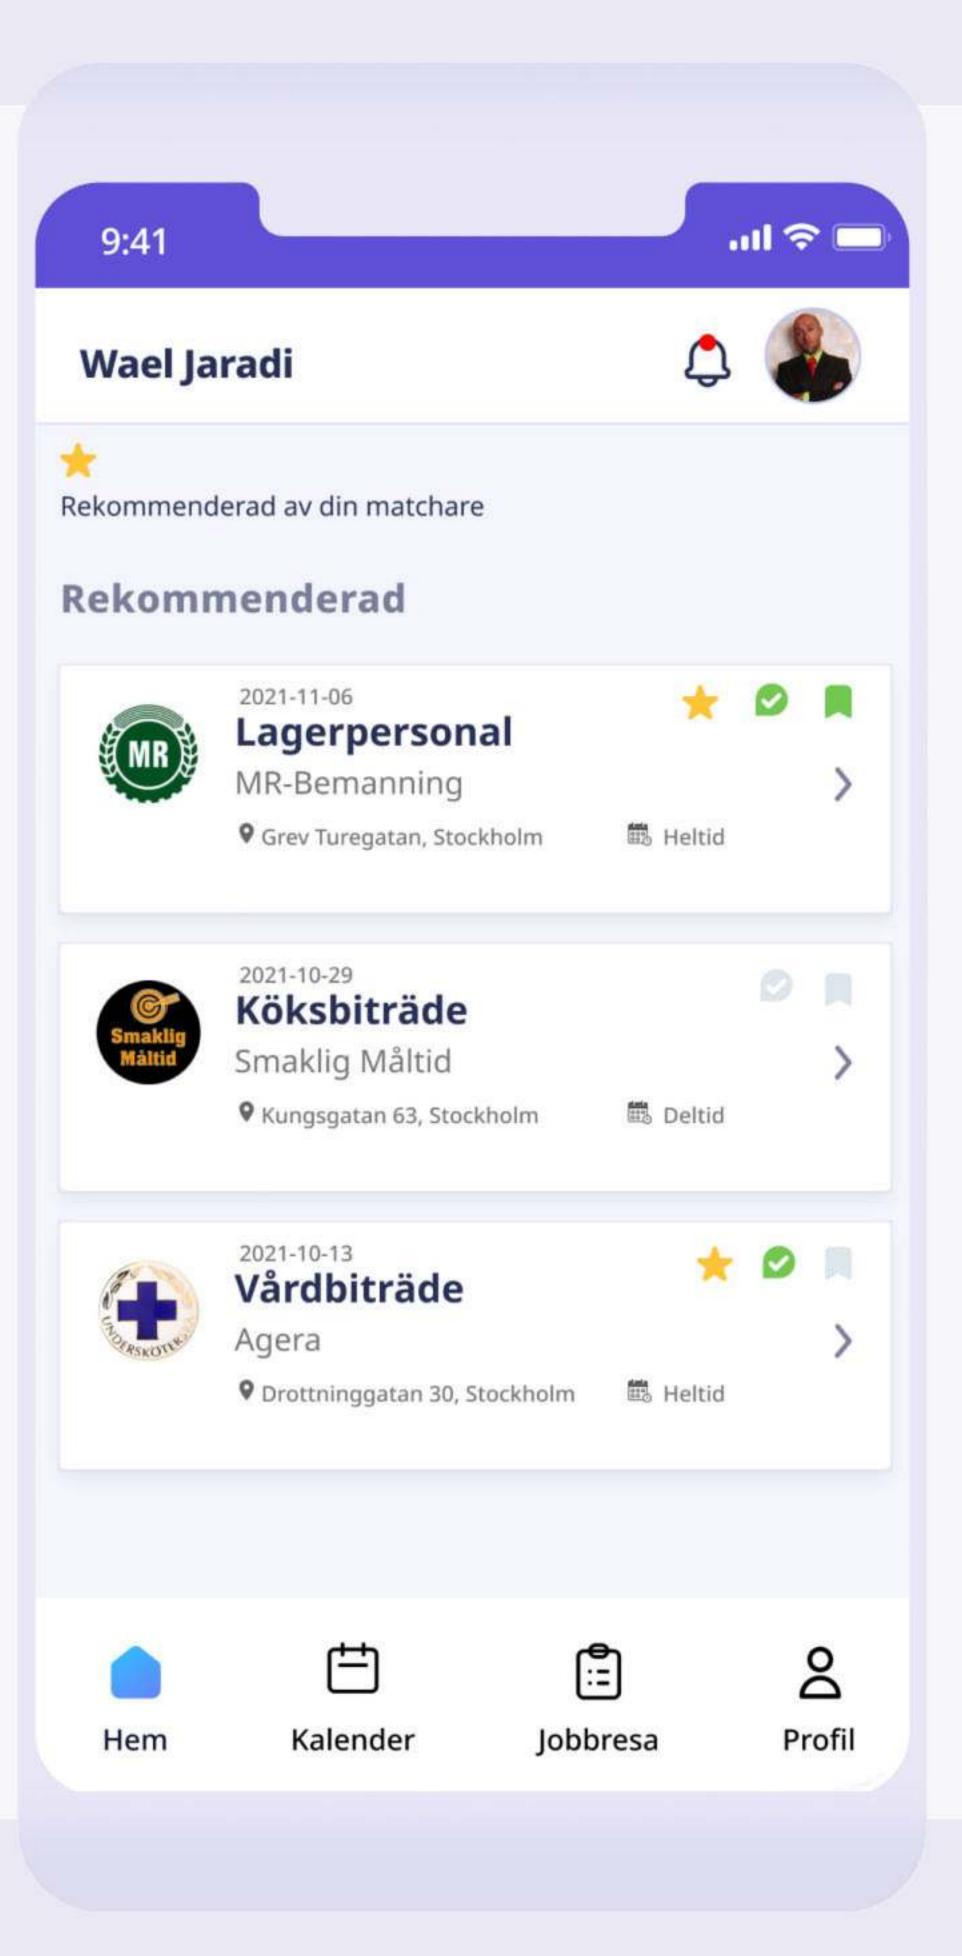

Through structured data collection from each participant, Curonova has the ability to segment and analyse cohorts of participants at a granular level. When a participant finds a suitable job one of our coaches helps them along in the application process with prospective employers.

Highly specialized job recommendation system

As the majority of Curonovas participants are long term unemployed, Curonovas pool of potential jobs or educational programs need to adhere to this niched segment of the labour market. **Focus is on the quality and applicability of job opportunities rather than quantity.**

Personalized user experience

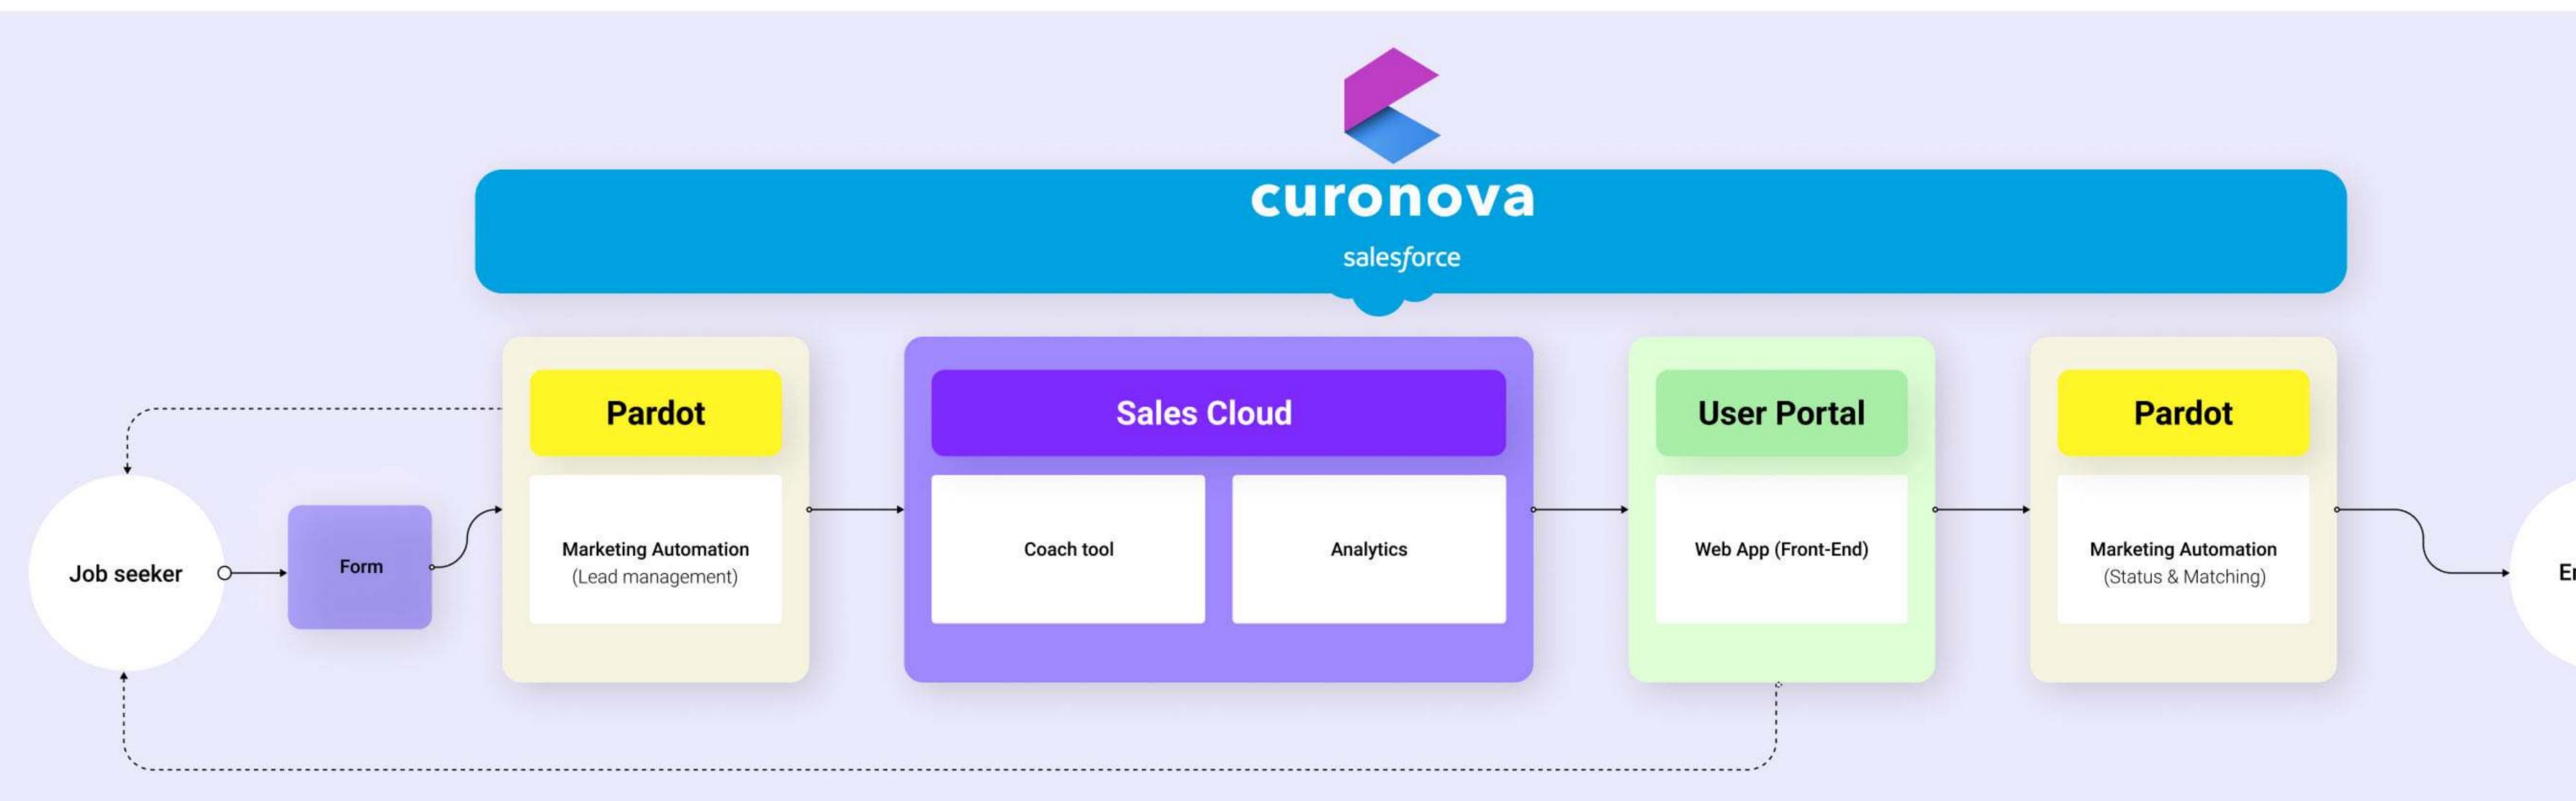

Curonova will provide each participant with a personalized user experience. Job recommendations are based on the personal evaluation of the participant.

SYSTEM ARCHITECTURE

Curonova's backend is built upon a standardised Salesforce system architecture where several modules are integrated together with Curonovas user portal in order to facilitate a complete solution for Curonova throughout the whole customer journey.

Market Value (MSEK)

THERE IS NO LEADING EUROPEAN DIGITAL EMPLOYMENT SERVICE PROVIDER... 01

Internationalisation

Curonova is looking to grow in international markets following a similar playbook to Swedish digital health care providers such as Kry that used Sweden to refine its digital platform and thereafter launched subsidiaries in new countries.

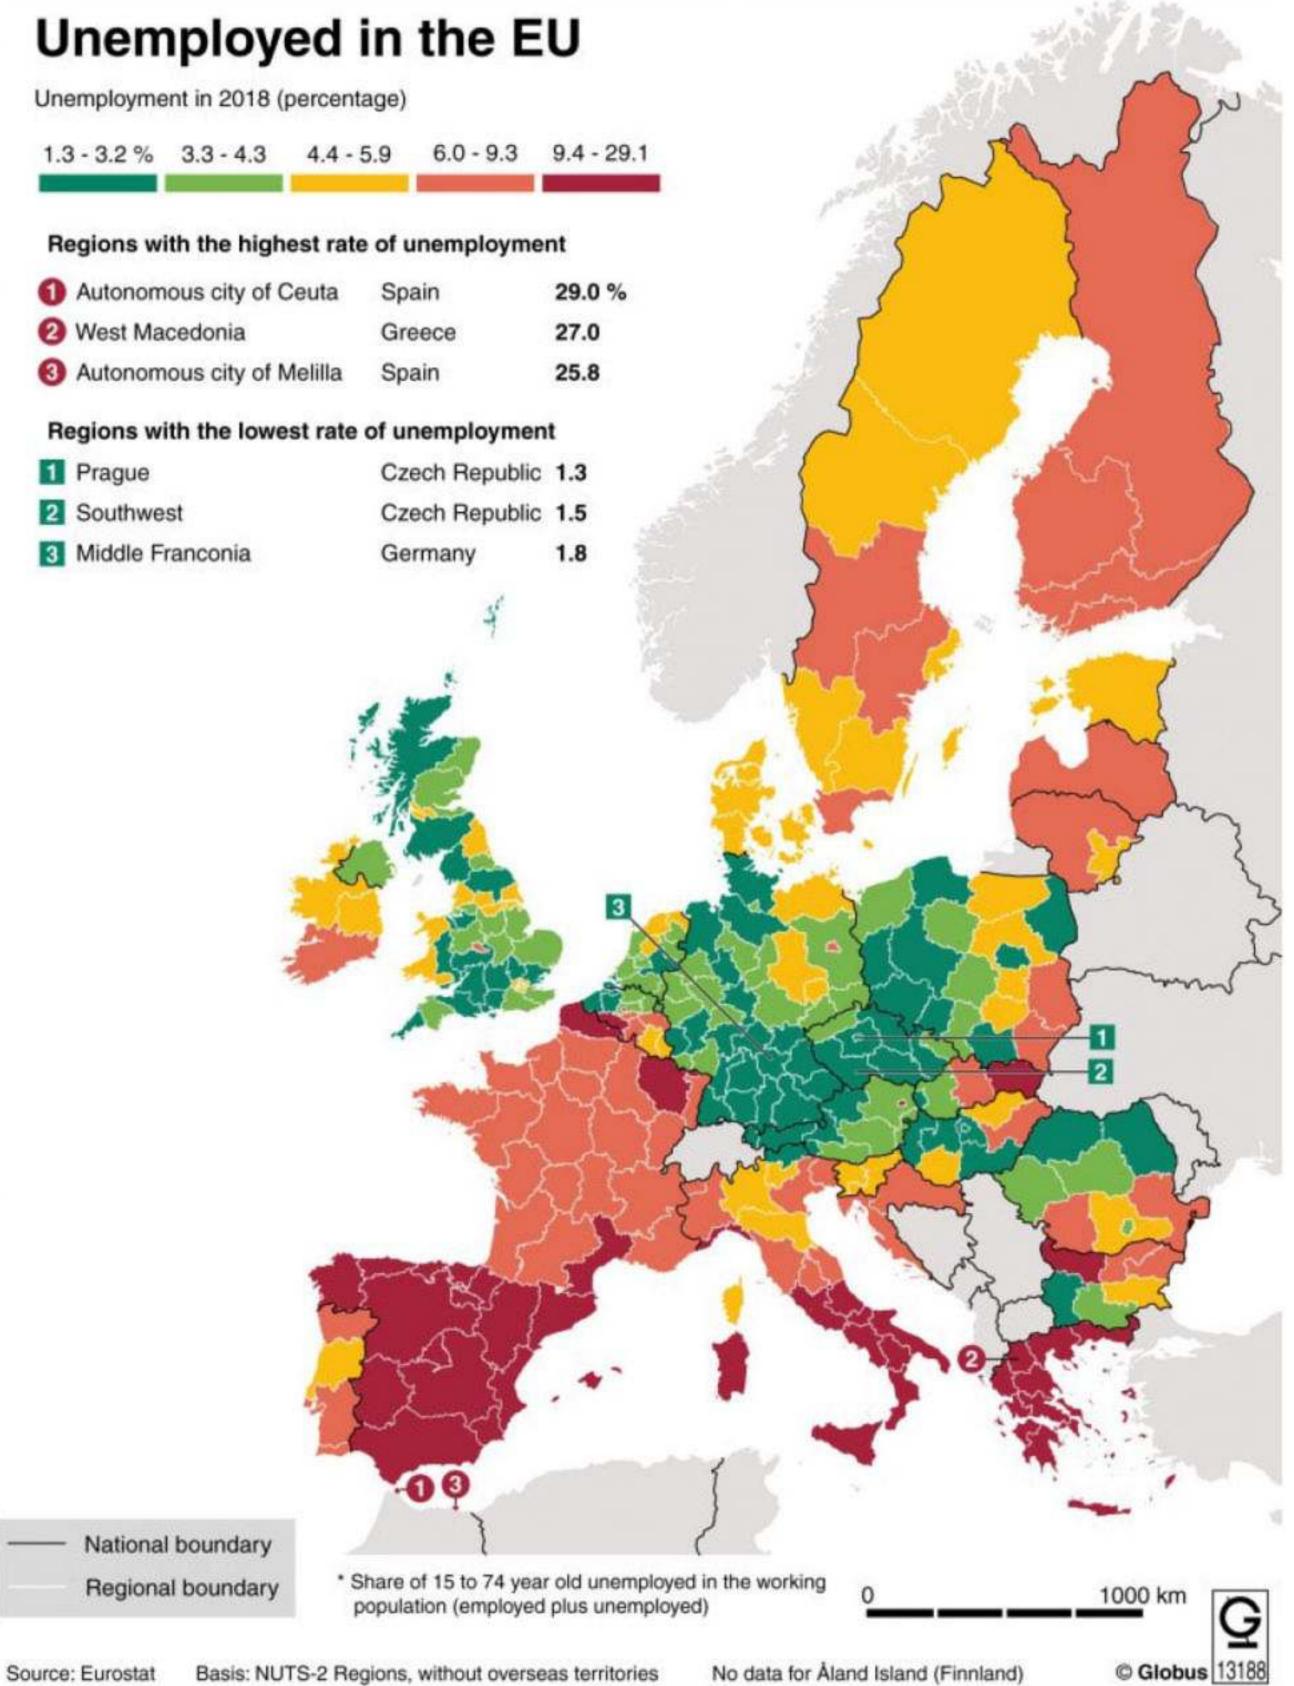

Due to varying regulations and funding programs across European countries, Curonova would adapt certain elements of its platform to adhere to the needs for each specific country.

Curonova's digital platform can easily be translated into other languages.

Access to international markets could be implemented by aquisitions or through a joint venture structure partnering with a local company.

THERE IS NO LEADING EUROPEAN DIGITAL EMPLOYMENT SERVICE PROVIDER... 02

| Country | Agency | Services | Market Size |
|-------------------|--|--|-------------|
| Norway | Ny Arbeids- og Velferdsforvaltning (NAV) | Long term unemployment service, rehabilitation, shorter work related educational tracks | €250M |
| United Kingdom | Department for Work and Pensions | Long term unemployment service, work related educational tracks. | £ 2,9B |
| Germany | Bundesagentur für Arbeit | Long-term unemployed, single parents, refugees and migrans | N/A* |

*= Expenditure for public funding relating to employment services is done at the local level across Germany.

Sources: *Werket * https://www.gov.uk/government/publications/restart-scheme 1. Norway

NAV services include mapping of work capabilities, guidance services, rehabilitation, and shorter work related educational tracks. The market is approximately €250M and is composed of some 200 suppliers.

2. United Kingdom UK procurement program "Restart" focuses on the long term unemployed. with a compensation potential of 2,9 billion GBP during the full 3 year program period.

3. Germany Portfolio of employment services contracts supporting the longterm unemployed. The market is divided by Local Labour Agencies in different regions.

THERE IS NO LEADING EUROPEAN DIGITAL EMPLOYMENT SERVICE PROVIDER... 03

3. France, Austria, Belgium and the Netherlands

All of these countries have procurement processes related to private employment services and targets similar groups of unemployed to those in Sweden. They also have few digitalised private employment service providers.

4. South Korea, Canada, Australia and New Zealand

These countries all have similar models to the Swedish private labor market and can easely be approached though a marketing growth strategy.

NAVIGATING IN POLITICAL MARKETS

"Instead of private companies merely being complementary providers of our services, they shall now become the only providers, while we are responsible for assessment, decisions, control and follow-up."

Maria Mindhammar, Director General of the Swedish Public Employment Agency, January 2022.*

Source: *www.di.se/nyheter/hog-af-chef-slutar-efter-konflikt-om-privatisering/ *Werket

The reform shows great early success

ROM, the new privatization model that the reform will build on launched earlier this year and has so far shown very positive results with early data showing that over 41 percent of the unemployed participants are being matched with a job. The previous system STOM only matched around 28 percent.

The government is very positive about private suppliers' costeffectiveness and wants to see far more participants in the activity going forward. However, they want to wait for more data before they chose to scale up the activity.

RECESSION PROOF

Growing market during times of high unemployment

As demand in the economy is judged to be weaker than expected the government now sees a recession going on for at least two-three years.

The new Minister for finance of Sweden, Elizabeth Svantesson, said in a recent statement that the unemployment numbers are likely to rise by 20-30 percent as early as next year. In previous recessions Sweden has had an unemployment rate of about 10-12 percent, compared to the current low unemployment rate of 6,4 percent in December 2022.

The government is prepared to, if necessary, take further measures and raise the number of participants that are eligible for the private labor market ROM during their mandate period as the situation on the labor market deteriorates and the private labor market continues to show great efficiency in getting jobs for the long therm unemployed.
